PROJECTS

JIGYAASA JULY-2022 TO AUGUST 2022

JigyAasa is basically a doubt solver which we made for solving General, Technical as well as personal doubt for our college Student. I Worked as Backend as well as Frontend Developer.

Github- <https://github.com/YashAPro1/Jigyasa> full project code

Github- [JigyAasa \(yashapro1.github.io\)](https://github.com/YashAPro1/Jigyasa) just frontend

THE SNAKE GAME JULY-2022 TO AUGUST 2022

This Game is mainly inspired by the snake game we used to play in childhood, Which I made using Python Turtle Library.

Github - [YashAPro1/SnakeGame](https://github.com/YashAPro1/SnakeGame)

POMODORO TIMER

Works exactly like a Pomodoro timer. Used Python Tkinter Library. This is the place for a brief summary of your key responsibilities and accomplishments.

AUTOMATED MAIL

I made his for wishing birthdays by using smtp library of python.

Github - [YashAPro1/automatedemail](https://github.com/YashAPro1/automatedemail)
