PROJECT

JigyAasa— *JULY 2022-AUGUST 2022*
JigyAasa is basically a doubt solver which we made for solving General, Technical as well as personal doubt for our college Student. I Worked as Backend as well as Frontend Developer.
Github-YashAPro1/Jigyaasa(github.com) full project code
Github- JigyAasa (yashapro1.github.io) just frontend

The Snake Game— *Detail*
This Game is mainly inspired by the snake game we used to play in childhood,Which I made using Python Turtle Library.
Github - YashAPro1/SnakeGame

Pomodoro Timer— *Detail*
Works exactly like a Pomodoro timer. Used Python Tkinter Library.

Automated Mail— *I made his for wishing birthdays by using smtp library of python. YashAPro1/automatedemail(github.com)*
